TITLE INDEX

(Titles in italics are for book reviews)

A Naming and Trading Facility for a Distributed System 50-65

A Syntactic Approach to the Recognition of Common Cardiac Arrhythmias within a Single Ambulatory ECG Trace 102-112

An Architecture for Client/Server Application Software 30-41

An Introduction to Segmentation of Magnetic Resonance Medical Images 90-98

Artificial Intelligence and Mathematical Theory Computation 22

Artificial Neural Networks and Breast Cancer Prognosis 78-81

Automated Reasoning: Essays in Honour of Woody Bledsoe 22-23

Comparison of Centralised and Decentralised CT Radiology Services using Separated Scan Heads, IT and High Speed Communication Links — A New Telemedicine Study 82-89

Compiling Parallel Loops for High Performance Computers 25-26

Compression and Fast Indexing for Multi-Gigabyte Text Databases 1-9

Computer Society Reference Book 28

Computer Vision and Image Processing 68

Computerised Accounts (Third Edition) Cover III (Nov)

Confidentiality, Privacy and Security Concerns in the Modern Healthcare Environment 70-77

Data Communications Testing and Troubleshooting 23-24

Data Fusion in Robotics and Machine Intelligence 24

Distributed Artificial Intelligence: Theory and Praxis 25

Distributed Computing. A Practical Synthesis Cover III (Nov)

Enterprise Information Technologies Cover III (Aug)

Essentials of Logic Programming 27-28

Exploiting Chaos — Cashing in on the Realities of Software Development 24-25

Foundations of Knowledge Acquisition: Machine Learning 26-27

Generating Abstraction Hierarchies: An Automated Approach to Reducing Search in Planning 26

Generic Re-Engineering Environment Design Criteria: An Evaluation of the Software Refinery™ 152-157

Graph-based Class Testing 158-163

Information Engineering: Strategic Systems Development 68

Inter-Connection of Software Components in Intelligent Decision Support Systems 11-19

Mathematical Modeling 24

Parallel Algorithms and Architectures for DSP Applications 23

Patient Focused Care — Self Contained Units Reduce the Need for Information Processing 99-101

PC Magazine DOS 6 Techniques & Utilities Cover III (Aug)

Physically-Based Modelling for Computer Graphics Cover III (Aug)

Practical Neural Network Recipes in C++ 27

Quality Management for Software 164

Quality Management within PRINCE 68

Running MS-DOS 164-Cover III (Nov)

Scalable Shared Memory Multiprocessors 22

Scientific Computing: An Introduction with Parallel Computing 164

SEE-Ada: Software Evaluation Environment for Ada 143-150

Simple Program Design 25

SoftEAM: A Design History and Justification Maintenance Tool 124-133

Software Production Management Cover III (Nov)

Software Reusability in Australia 134-142

Specification of Schedules Using the Modal-μ Calculus 42-49

Surviving Paradigm Shifts in Software Development Technology: A Management Case Study of Industrial Experience 114-123

TEXHelp: The On-line TEX Handbook 27

The Computer Artist's Handbook 24

What is DIP? — A Guide to Document Image Processing 164

What is EDI? — A Guide to Electronic Data Interchange (2nd Edition) 164
